

TRUFILTER

OIL SYSTEMS

LIFETIME WARRANTY & FITMENT SUPPORT

WASHABLE • REUSEABLE • HIGH-PERFORMANCE DESIGN • 100% FILTRATION

Trufilter Oil Systems is a revolutionary design that provides for 100% filtration through duplex woven, deep pleated .45 micron surgical stainless steel filter media. Our filter allows you to choose from a bypass valve and/or a bypass plug that includes a rare-earth magnet. These extremely powerful and compact rare-earth magnets will capture the smallest of metal particles and stop the metals from re-entering your engine. Combined with our filter media, this combination will filter your oil like no other filter on the market. Tests show that Trufilter is 95% more efficient in capturing .35 micron and smaller particles. Lab tests proved that 40 micron particles are the most damaging to your engine! Paper filters don't even come close! Why trust your valued investment to a \$2.00 paper filter?.
